-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1-18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claim 1, the recitation "inserting, when the waveform signal consecutively repeats a single pattern, a different pattern between the repeated single patterns before transmitting the repeated single patterns; and transmitting said repeated single patterns having the inserted different pattern between the repeated single patterns" does not appear that a claim reciting a signal encoded with functional descriptive material falls within any of the categories of patentable subject matter set forth in paragraph 101.

Regarding claim 15, the recitation "randomly varying an internal parameter, selecting one of the two types of codes, and transmitting said selected one type of code in accordance with the internal parameter" does not appear that a claim reciting a signal encoded with functional descriptive material falls within any of the categories of patentable subject matter set forth in paragraph 101.

Regarding claim 18, the recitation "a transmitter for transmitting a signal such that, when the information waveform signal consecutively repeats a single pattern, a different pattern is inserted between the repeated single pattern before transmitting the single pattern and the repeated single patterns having the inserted different

pattern are transmitted" does not appear that a claim reciting a signal encoded with functional descriptive material falls within any of the categories of patentable subject matter set forth in paragraph 101.

Allowable Subject Matter

2. Claims 19-21 are allowed.
